

HDPE Square Frame Foot for 41mm Channel

Description

Premium quality high-density polyethylene frame foot, ideal for rooftop installations. High load-bearing properties, spreads installation weight evenly across footprint area. With 41mm square inset to top of foot, to accept vertically-mounted 41x41mm channel.

Material

High Impact HDPE (High-Density Polyethylene)
100% Recycled material.

Anti-vibration

Fitted with an anti-vibration pad pre-attached. These help prevent migration between the roof and plastic.

Product Code	Width	Length	Height	Max Load per foot
10605	305mm	305mm	120mm	150kg
10625	500mm	500mm	120mm	240kg
