How to install...

▶ Watch the installation video at www.Lindapter.com

- 1) Pre-assemble the Locking Plate and wedge (flat surface facing up) onto the threaded rod.
- 2) Insert wedge into the re-entrant channel of the decking and rotate 90°.
- 3) Slide the plate up the threaded rod, over the wedge, to lock it in position into the channel.
- 4) To hold the assembly in position, tighten a nut beneath the plate and washer to the tightening torque specified in the table above.

➤ Install the decking fixings after the concrete has been poured and has reached full strength.

➤ If the decking profile is deformed or distorted, do not install the fixing. If in doubt, contact the Technical Support team for advice.

Decking Fixings

High quality, cost effective connections for securing building services. Designed to fit inside the dovetail re-entrant channels of popular composite decking profiles, Lindapter's fixings provide a zero-impact method that avoids delamination and damage to the decking.
