

## TekSpan® Cross Plate for 100mm Frame

For connecting 100mm TekSpan frame profiles.

## Technical details

|                   |                    |
|-------------------|--------------------|
| Part code         | R954-123           |
| Unit of measure   | 1                  |
| Weight            | 2.89kg             |
| Material          | S275 Steel         |
| Finish            | Hot-dip galvanised |
| Width             | 200mm              |
| Height            | 370mm              |
| Gauge / thickness | 6mm                |
| Slot size         | 14x40mm            |
| Load Fx           | 40 kN              |
| Load Fz           | 40 kN              |
| Limited torque My | 1.2 kNm            |
